

STAT 412 QZ07 — Question 4

Problem

Without using the terms “null hypothesis” and “alternative hypothesis,” identify the type I error and type II error.

H_0 : The car is old.

H_a : The car is new.

Solution

A type I error rejects a true H_0 , so it means rejecting the claim that the car is old when the car is old.

A type II error fails to reject a false H_0 , so it means failing to reject the claim that the car is old when the car is new.

Final Answer

Choice C.
