

10 Minute Video Rubric

(This document serves as a summary of the rubric, while the comprehensive details are outlined in '10 Minute Video Rubric - Detailed.pdf')

Content (65%)

1. Introduction (10%)

- Elevator Pitch
 - Problem Statement
 - Customer / Project Origin
- Project Purpose
- Product Importance

2. Design Considerations (20%)

- Assumptions made, project dependencies
- Project constraints, followed industry standards
- Safety considerations, etc.

3. System Architecture (20%)

- Architectural diagram / System design overview and details
- Highlight major subsystems and their designs
- Internal or External communication architecture

4. Subsystem / Detailed Design (15%)

- Subsystem design overview
 - Software design diagrams (UML, subsystem collaboration graphs, etc.)
 - Hardware design diagrams (High-level schematics, wiring diagrams, etc.)
- Interface detailed design diagrams (interfaces / exports)
- Budget (Still important if it is a 100% software project: e.g., any commercial software used, all open-source, etc.)

Effectiveness of Presentation (35%)

- Lessons Learned (4%)
- Project Timeline (4%)
- Team Member Participation (4%)
- Verbal Communication Quality (5%)
- Use of Visual Aids (8%)
- Presentation Time Management (10%)

Evaluation Criteria:

- **Excellent:** Clear, concise, and well-organized presentation with strong content relevance, balance, and alignment with the project's mission.
- **Satisfactory:** Adequate presentation with some clarity and coverage, but with room for improvement in organization and content relevance.
- **Unsatisfactory:** Lacks clarity, coherence, and relevance, with significant gaps in content and presentation quality.
