

Category	Excellent (5 points)	Satisfactory (4 points)	Needs Improvement (0~3points)	Weight (%)
Project Execution & Outcomes	Project successfully meets objectives; strong technical results; clear design and testing evidence.	Project mostly works or shows progress toward solution; partial results with some challenges discussed.	Project has minimal or failed outcomes with limited justification or poor execution.	20%
Understanding & Critical Thinking	Deep understanding of the problem, design process, and results (even if negative); shows analysis, troubleshooting, and design iteration.	General understanding shown; explains process but limited depth in reflection or design decision-making.	Weak understanding; little discussion of engineering decisions, troubleshooting, or lessons learned.	20%
Poster Content & Clarity	Clearly describes problem, approach, results, and conclusions; concise, accurate, and easy to follow.	Content is mostly clear but may lack detail, include minor errors, or have slight organizational issues.	Disorganized or unclear; major information missing or inaccurate.	20%
Visual Appeal & Organization	Layout is clean, logical, and visually engaging; effective use of diagrams, charts, and minimal text.	Visuals are generally good; some clutter, minor font or color issues; diagrams may	Poor formatting or hard to read; too text-heavy or lacking visuals.	15%

		lack labels or clarity.		
Oral Presentation	Confident, engaging, and clear oral delivery; answers questions insightfully; explains challenges and trade-offs well.	Adequate delivery; some reading or filler words; answers basic questions but not confidently or completely.	Weak delivery; struggles with explanation or questions; appears unprepared.	15%
Professionalism & Preparedness	Timely, well-prepared, professionally dressed and composed; shows respect to the audience and teammates.	Mostly prepared and professional; may miss minor details.	Unprepared, unprofessional, or late; poor teamwork or unengaged behavior.	10%

Important:

Please visit the department hallway to review examples of posters. There are both strong and weak examples on display, so be selective—not all posters are good references.

Additionally, you can explore more posters from past Student Research Symposia at the link below. You may find useful ideas from well-designed posters, as well as lessons learned from less effective ones: <https://commons.erau.edu/db-srs/>
